PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8804

SESSION NUMBER: 2

DATE OF SESSION: 15 SEP 88

DATE OF REPORT:

START: 1025

END: 1055

METHODOLOGY: CRV

VIEWER IDENTIFIER: 003

SG1A

1. (S/NF/SK) MISSION: DETERMINE THE PURPOSE/FUNCTION OF THE STRUCTURE
[REDACTED] LOCATED AT COORDINATE 557803/870630.

SG1A

SG1A

2. (S/NF/SK) VIEWER TASKING:
[REDACTED]

3. (S/NF/SK) COMMENTS:

4. (S/NF/SK) EVALUATION: INSIDE THE OBJECT THERE IS SOMETHING REVOLVING OR ROTATING, THERE IS AN ASSOCIATION WITH SOMETHING "LIKE" CURRENTS MOVING IN AND OUT AMONGST EACH OTHER. A FEELING OF IMMENSE POWER/FORCES BEING DIRECTED AND/OR CONTROLLED.

HANDLE VIA SKEET CHANNELS ONLY

SECRET//NOFORN

CLASSIFIED BY: DIA (DT)
DECLASSIFY: OADR

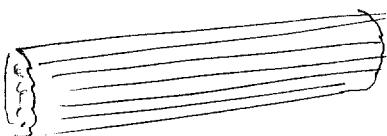

Object viewed in last session is complex on the inside, with the sense of components being "packed in". Once it's through being assembled/manufactured, it's moved from its present location, though not far, at least at first. It's "like" it goes into storage. Sense of other parts similarly being made and all must be finished before anything further happens. Then all pieces are moved somewhere else and put together. When together it is considerably larger than now, and seems to spend most of its time horizontal. It is a technical-type of object not strictly designed for military use, though it has indirect military applications. Idea of science, but hard, practical science, "like" applied physics as opposed to theoretical physics. Not even necessarily scientific, but the same idea of applied vs theoretical. Impressions of venturis, flow-through, yellow, oxidation, packing, corrosive, impulsing, granular, dense, pelletized were received, but may be connected with an AOL or AOL/S of solid fuel rocket propellant. A further object seem to have been perceived with an up-and-down "bobbing" movement suggestive of a height-finder radar antenna. There was further a possible long, boxey, heavy wheeled vehicle, which produced the AOL of SS-21. The large, grey, vertical, fluted object mentioned in the past session was again targeted. There was a sense "like" something goes on inside this object that involved whirling or "like" currents moving in and out amongst each other twisting and combining and mixing; vortices. Associated with this is orange, warm, energetic, bright, flowing, heat, combining, an AI of overwhelming power; forces, power, immense, directed, controlled, somewhat directable. There was a further sense of encompassment and being restrained, as if the forces involved are contained, restrained--an intricate web of physical or other restraints are employed to control and direct the power that is involved here. It can't be subdued, only controlled and directed and exploited. (A/S Like Gulliver and all the Lilliputian ropes).

'packaging'

Such piece is done being assembled/manufactured, it's moved from its present location, though not far at least at first. Like it goes into standby storage. Some of other parts similarly being made + all until a finished (before assembly) form. All pieces are moved somewhere else + put together.

Set when assembled/put together it is considerable longer than now, & seems to spend most of its time horizontal. Technical type of object not strictly for military use, though has military applications indirectly. Idea of science but part practical science, "like" applied physics as opposed to theoretical physics. Not even necessarily scientific but that's the idea "applied" vs "theoretical".
